● HOW will you engage with people to define changes?

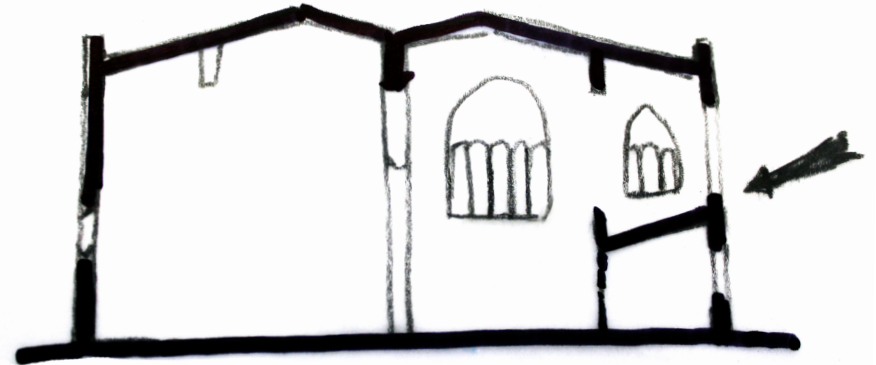

WHAT changes are needed or wanted?

- **Draw and / or describe an IDEA for change**

To remove clutter from the galleries, as they are currently used only as storage area, but retain some historical pews in the south gallery.

The sketches show the amount of space that is currently wasted.

- **WHO will be affected and who can help make those changes?**

This change is for the benefit of visitors that would have the opportunity to get a unique view of this historical building. The space may also be used as a seating area for the café. This doesn't affect negatively any people and nobody has expressed concerns.

Removing clutter is a small job that a small group of volunteers can achieve.

- **HOW will you engage with people to define changes?**

The building group of the church has already organised an event with the congregation and current users (Café, third space) to generate ideas about the future of the building and this was one of the key ideas. 15 people participated in that event. A follow up event can be organised to gather further feedback and recruit volunteers.
